HECOF initiative is to create systemic change by fostering innovation in **Higher Education (HE)** teaching practice and national reforms in education by developing and testing an innovative **personalized, adaptive** way of teaching that uses digital data from students' learning activity in immersive environments such as **VR** and computational analysis techniques from **data science and AI**.

FINAL PLENARY MEETING OF THE CONSORTIUM

Reflecting on achievements, aligning on impact, and shaping the future beyond HECOF

As part of the final phase of the HECOF project, the consortium held its last plenary meeting in Brussels. This important gathering brought together all project partners to reflect on three years of collaborative work, finalize reporting and deliverables, and discuss the long-term impact of HECOF's results. The meeting also served as a platform to explore future collaboration opportunities, ensuring that the project's innovations in digital education and personalized learning will continue to inspire and influence the higher education landscape across Europe.

HECOF INTERNATIONAL FINAL CONFERENCE

A Vision for the Future of Higher Education

On May 22, 2025, the HECOF project hosted its International Final Conference in Brussels, bringing together educators, policymakers, researchers, and technologists from across Europe. The event marked the culmination of three years of innovation, showcasing how AI-driven personalization, immersive technologies, and data-informed approaches are reshaping higher education.

Participants engaged in insightful sessions on project outcomes, pilot experiences in Italy and Greece, ethical considerations in AI, and synergies with other EU-funded initiatives. The conference underscored HECOF's central role in pioneering the digital classroom of tomorrow and inspired continued dialogue on transforming learning for the next generation.
